

Enerflex in action

Permian Basin, Texas, USA

16 gas lift compression
packages moving
1.2 MMSCFD

Enerflex technicians delivered on an aggressive time scale with a flexible approach – retrofitting ten newly built packages while building 6 more – flawlessly within three months.

Enerflex Contract Compression responded to a rapid turnaround request from one of the industry's leading players – with extremely high standards in equipment, regulations, and safety.

Needing to move 1.2 MMSCFD of natural gas against an aggressive timescale demanded a flexible approach. In conjunction with our after-market service, manufacturing, engineering, and design teams, Enerflex was able to retrofit ten newly built, in-stock fleet packages to match the customer's higher specifications – while also building 6 new packages – in order to make the delivery deadline.

Collaboration between Enerflex and our customer meant that more sixteen fully compliant CAT 3306TA gas lift compressor packages were delivered flawlessly within three months.

Outcome

The customer reserved further units, indicating that Enerflex is now a strategic partner in their West Texas operations with more than 24 packages set in the field to date.
